

the proven technology

JAIN POLYMER CO.

PTFE / TEFLON

Heat Resistant Wires & Cables

Heat Resistant Tubing & Sleeves

Heat Shrinkable Tubings

ADVANTAGE

Of experience, expertise & commitment

THE GROUP

Jain Polymer Co. was promoted in the year 1991 by *Shri S.K. Jain proprietor*, who has long experience in the cable manufacturing. The company is engaged in the manufacture of PTFE/TEFLON based wide range of products.

PTFE-ADVANTAGE

PTFE has many advantages like excellent thermal stability, perfect endurance to heat ranging from interness to all chemicals, non-contaminating, non-toxic, suitable upto 10 Ghz, highly compact in size, light weight, low dielectric constant and dissipation factor with higher volume and surface resistivity, good mechanical strength and excellent flex-life, flame proof etc.

These types of products have a specific use in various types of purposes like Power Generation, Thermal Insulation, Panel Boards, Process Control systems, Temperature Monitoring Equipments.

QUALITY ASSURANCE

All our products are manufactured under strict quality control and conforming to JSS and MIL standards. Due to the specific end use of our products, it is very essential that the quality should be built-in.

With the available infra-structure and the know-how, we are capable of undertaking development of any other similar products as per the requirements of our clients/customers.

JAIN POLYMER CO.

*Excellence in Engineered
PTFE/TEFLON...*

*...meeting your needs...
exceeding your expectations.*

An eye for technology...

ahead of times.

Making a difference

- * World Class Quality standards.
- * Extensive technical resources for R&D.
- * Dynamic team of dedicated professionals.
- * Products approved by :
L.C.S.O (Ministry of Defence) &
C-DOT (Centre for Development of Telematics)

PRODUCTS RANGE

The company is presently engaged in the manufacture of following types of products which are required for use for a specific purpose :

PTFE Hook-up (Equipment) Wires

As per JSS 51004 (as revised JSS : 51004) and MIL-16878-E using annealed copper, SPC, NPC or Copper Weld wires for sizes AWG-30 to AWG-8 in 10 standards solid colours.

Multi-core Cables

With PTFE insulated cores, shielded & PTFE/PVC/Varnished F.G. outer jacket.

Co-Axial and Tri-axial PTFE Cables

These are miniature precision Co-axial Cables as per JSS-51100 and MIL-C-7 of types RG-196 A/U, RG-198 A/U, RG-195 A/U of 50, 75 and 90 Ohms characteristics impedance along with type RG-115 A/U, RG-140 A/U, RG-141 A/U, RG-142 A/U.

Silicon Rubber Tubing

PRODUCTS RANGE...

Thermo Couple and Compensating Cables

PTFE Insulated cores, Flat, Twisted, Shielded and PTFE jacketed with all standards thermo-couple conductor pairs.

PTFE Sleeveings

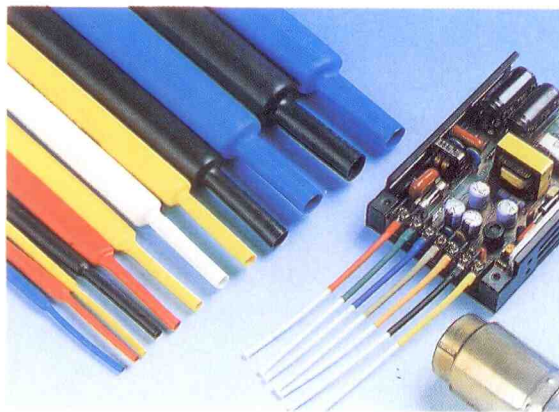

As per JSS 54802 & MIL-1-22129 in bore sizes 0.3 mm to 30 mm, wall thickness from 0.25 mm, in complete range of solid colours with pink & natural.

Premium Electricals Grade PTFE Tape for Cable Wrapping

PTFE Tape for electrical insulated purpose, 150 mm wide jumbo rolls or slitted, in all standards colours.

PTFE Thread-Seal Tape

"JAIN FLON" brand thread-seal tape is used for application in all threaded/pipe joints irrespective of pipe material and chemical/gas/oil, being carried by the pipe, in widths of 12.5 mm, 19 mm and 25 mm.

JAIN POLYMER CO.

*Dedicated to providing
the highest
quality standards.*

COMMITMENT

To quality, innovation & reliability

QUALITY POLICY

The products being manufactured by us have a specific role in effective working of any system. It is ensured that the product meet the requirements of end-use in all respects and does not adversely affect the working of the main systems.

It is ensured that no defective products are supplied.

No compromise is made on quality at any cost. It may become necessary sometimes that the price of the products may exceed the initially assessed price to meet the quality of the products.

Effective procedure of contract review is implemented for study and compliance of contracted matters while executing an order.

The effective manufacturing process and work operations are identified. A suitable quality plan is prepared for each types products keeping in view the specific requirements.

Raw material not confirming to the specifications are not cleared for use at shopfloor.

Internal audit of the product is carried out before release of stores to the consignee.

A system of pre-inspection report is adopted.

Stores are supplied in standard lengths. An approval of Purchaser will however, be obtained before supply of any such non-standards lengths.

To ensure the accuracy of the test equipment's, a periodical calibration is carried out.

Accuracy of test jigs/fixtures is verified at suitable intervals.

Stores meant for despatch after inspection and tests are suitably packed to avoid any damage or deterioration during transit.

Customer complaints are suitably analysed. In case the Purchaser is not satisfied with the quality of goods due to any reason, the same will be replaced free of cost.
